Weighsoft LIVE is the mobile solution for the waste, aggregate and ready mixed concrete industry. Weighsoft LIVE replaces the paper ticket with an electronic one, although paper copies are still produced on site for your clients.

Weighsoft LIVE links seamlessly with your back office Weighsoft; as you allocate work, it appears on a driver's unit. Once a customer has signed for the job, you can see all the ticket information, including the electronic signature within seconds. Producing copy tickets is simple and fast, and clients can view tickets online using the Weighsoft ONLINE portal.

Weighsoft LIVE can also record your drivers' daily vehicle checks and they can report any defects. All vehicle checks are held within Weighsoft and can be printed at any time.

Weighsoft LIVE is written by ourselves using our own Cobra Mobile Data development tool. This means that we can adapt solutions to meet your company's individual requirements. Weighsoft LIVE can run on the majority of devices available, however we have found the CASIO IT3000 / 3100 offers the best solution. The device has an integrated printer which removes the need to purchase, carry and charge a separate printer. The unit is IP47 rated and has proven itself in the field to be reliable and the best unit for the job.

Weighsoft LIVE can communicate to your back office solution using Wireless LAN or GPRS. We supply Vodafone and Orange connections depending on the best coverage in your area.

Weighsoft LIVE delivers many cost savings through improvements in administration efficiency. Schedulers can be more flexible and allocate work LIVE without needing manual tickets; simply add and remove jobs from a driver's schedule throughout the day. Copy tickets can be printed off, emailed and attached to sales invoices automatically which will speed up internal processes and improve cash-flow. Signatures and tickets are stored securely on disk, removing the need to store boxes and boxes of copy tickets for years.

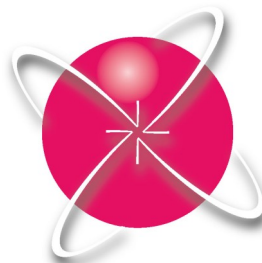

To find out more about Weighsoft LIVE, please email barie.fox@cobhamsystems.co.uk or call us on 01403 731840. We will be happy to come out and demonstrate the product and discuss specific requirements with you.
